

Software Developer For Established, Growing Tech Company

Lojistic - *located in Costa Mesa, CA*

Want to work for an established, growing company that's pursuing a compelling, industry-disruptive mission, loaded with potential? Orange County Business Journal listed Lojistic as one of the "Best Places to Work" in 2014, 2015, 2016 & 2018.

Lojistic is a technology platform that helps businesses reduce their shipping costs. Our platform is used by hundreds of companies of varying sizes, including Royal Caribbean, MillerCoors, LA Dodgers and Toshiba. Each week we process millions of rows of package data on behalf of our clients and aggregate that information into valuable insights and tangible savings opportunities. You'll play an integral role supporting our team as we grow the features and benefits we offer through our SaaS platform.

Ideally, you're a developer with a passion for creating brilliant solutions and eager to learn and grow your skills. Your experience working with teams designing robust solutions to challenging problems and processing data at scale is exactly what we need.

If this sounds like you and you're looking for a full-time salaried position (sorry, no contractors, vendors, or part-time employees) at our super rad corporate office (stocked with lots of amenities) across the street from South Coast Plaza...then let's chat!

Got skills? Here's what we're looking for:

- 3+ years of experience with web-focused programming languages (Ruby, Python, PHP or similar)
- Experience with Ruby on Rails preferred (but not required)
- Experience working with relational databases (Postgres, MySQL, etc.)
- Experience writing unit and integration tests
- Experience refactoring existing code in addition to architecting new solutions
- Experience using Git version control in a team setting
- "NICE TO HAVES" ...
 - Experience with modern frontend frameworks (Angular, React, Vue)
 - B.S. degree in computer science or related field
 - RESTful API design experience
 - Experience with continuous delivery and automated testing
 - Experience working in an Agile-like environment
 - A habit of leaving code cleaner than you found it

If that's you, here are some of the things you'll be responsible for:

- Designing and writing robust, testable, and scalable code
- Architecting solutions which help scale our data processing and storage to the Terabyte+ level
- Working with other developers and small teams to accomplish tasks/projects
- Promoting clean code and consistent design patterns across the team

Compensation, “Benies” & Other Cool Stuff:

Lojistic is consciously committed to happiness and self-progression, encouraging a healthy balance in our daily routines. Come be part of the fun that fuels our team.

- Competitive salary dependent on experience
- 401(K) with company match...cuz saving for retirement is the responsible thing to do
- Health and dental benefits...promoting healthy minds, bodies, and teeth
- Paid time off...because you deserve it
- Upscale, modern office space (<https://www.youtube.com/watch?v=KWo6CXdy2W8>)
- Company sponsored gym membership...gettin' physical!
- Company sponsored personal development initiative...boost yourself by learning something new
- Endless snacks, drinks, coffee and other break room goodies...no crash n' burn here
- Community “greater good” service programs (take a look - <https://youtu.be/L5fnjjYuomc>)
- “First Friday” celebrations (take a look - <https://www.youtube.com/watch?v=TLJtZhowiJA>)
- “Mix it up Monday” with a fresh juice or a killer smoothie...who said Monday’s aren’t awesome?
- Annual holiday event...it’s one awesome party with one heck of a crew
- Casual clothing, pleasant moods and good vibes are the norm...shaka-mahalo
